

CV4000H USB-C™ 4K HDMI & CV2000V USB-C™ HD VGA Adapters

CV4000H USB-C™ 4K HDMI Adapter – **K33993WW**

Take full advantage of the power of USB-C™ and the clarity of Ultra HD with our USB-C 4K HDMI Adapter. Professionals trust Kensington when it's important for their accessories to perform, and this adapter ensures you will be able to output video from your USB-C laptop to a 4K monitor, projector or TV with an HDMI port.

CV2000V USB-C™ HD VGA Adapter – **K33994WW**

As more USB-C devices get introduced using the new standard in connectivity, trust Kensington to provide the HD video that professionals need for better productivity. Our USB-C HD VGA Video Adapter is ideal for outputting 1080p video to a monitor, projector or TV with a VGA port.*

*For video output, the host device must support DisplayPort™ Alt Mode over USB-C

Additional Features Include:

Extend or Mirror Modes: Extend mode allows you to drag an open application to an external monitor so you can work across multiple screens, while Mirror mode allows you to replicate the content that's on your computer display to an external screen

Thunderbolt™ 3 Compatible: Can connect to laptops and tablets that have Thunderbolt 3 ports

Plug & Play: Simply plug in the adapter and it will run automatically without the need for drivers or downloads

Premium Construction: Using high-quality components means that you'll know your adapter will perform when you need it to and is completely safe to use with your valuable laptop and HD monitor or TV
