

Strong one-click security in a small design

ClickSafe® 2.0 Keyed Laptop Lock

From the industry leader in physical device security for 25 years, Kensington's ClickSafe 2.0 Keyed Laptop Lock offers all the strength and one-click convenience and keyless engagement of the original, but in a smaller, uncompromised design. Featuring the 5mm keying system with anti-pick Hidden Pin™ Technology, the ClickSafe lock head snaps onto the ClickSafe Security Anchor after it has been installed into the Kensington Security Slot™ found in most laptops. A carbon steel cable deters cutting attempts and the pivot & rotate hinge prevents awkward angles when inserting the key.

Features & Benefits:

- **Tough yet smaller lock head** offers uncompromised security for a wide variety of laptops and devices
- **ClickSafe® Lock** provides one-step security after the Security Anchor has been installed into a Kensington Security Slot, found on most laptops, increasing employee compliance
- **5mm Keying System** featuring patented anti-pick Hidden Pin Technology is compatible for custom solutions across different styles of Kensington locks
- **Pivot and rotate cable** provides superior laptop engagement
- **Independently verified and tested** for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion, key strength and other environmental conditions
- **Robust Key Management Solution** with Register & Retrieve™ a cloud-based service for key management and control, with options including Master Keyed (K64436M), Single Keyed (K64436S) and Like Keyed (K64436L)

Why Trust Kensington?

As the inventor and No.1 seller of laptop locks worldwide, Kensington's Security Slots are built into 95% of the world's laptops, projectors, printers and monitors.

Why Secure the Office Laptop?

- 40% of laptop thefts happen in the office
- 97% of stolen office laptops are never recovered
- Well-implemented security policies reduce laptop theft by 85%
- The loss of proprietary business data can be costly
