Why Include a Workstation Wrist Rest?

- Carpal tunnel syndrome (CTS) is the #1 reported medical problem, accounting for about 50% of all work related injuries CTS results in the second-longest average time away from work (27 days) among major disabling diseases and illnesses
- Employers spend more than \$7.4 billion in workers compensation costs, and untold billions on medical treatment, litigation costs, hidden costs and lost productivity treating CTS
- Wrist rests minimize the impact of repetitive strain on the hand - typing 40 words a minute equates to 12,000 keys per hour or 96,000 keys per 8-hour day

U.S. Bureau of Labor and Statistics,
