

Kensington®

NEW

USB3.0 Docking Stations

Ultrabooks® and other super slim laptop computers are reliant on sleek good looks but often lack enough ports for connectivity. As a result, you're constantly plugging and unplugging peripherals to connect to the devices you need. The Kensington USB 3.0 Docking Station turns one USB port into six so that with one hot swappable USB connection you'll have access to all of your peripherals even a 1080HD video monitor.

The NEW sd3500 & sd3000v Docking Stations with VGA / DVI / HDMI

Compatible with USB3.0 and 2.0

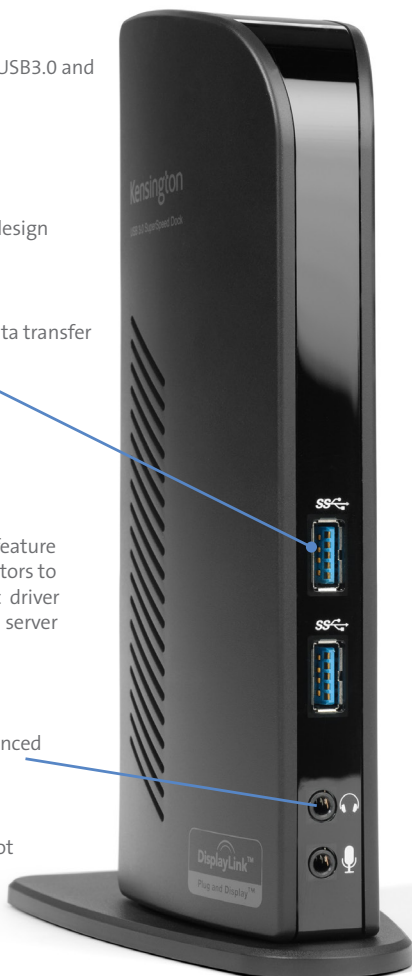

Slim, low-profile design

2 x High-speed data transfer of up to 5 Gbps

Corporate Install feature allows administrators to install the graphic driver onto a MicroSoft® server

Audio 2.0 for enhanced sound

Built-in security slot

4 x USB2.0 Ports
Optimised for Ultrabooks to turn one USB port into 6

Faster network and internet access with Gigabit ethernet connection

DVI to VGA and DVI to HDMI conversions for greater monitor compatibility

Dual 1080p HD video for high quality video

HDMI 1.3 supported

Quick one-touch USB connection for hassle free setup

Why Use a Docking Station

- You can connect to any notebook PC - so you easily enable hot-desking just by having a USB Docking station, monitor, mouse and keyboard at a desk
- Companies must provide ergonomically correct displays and workstations (Health and Safety (Display Screen Equipment) Regulations 992)
- Perfect fit for Ultrabooks - allows the use of small notebook like a full PC – even for notebooks with no docking station connector
- Cost effective - no obligation to upgrade when upgrading your notebook and it is cheaper than proprietary docking stations
- Provides an additional digital graphics output - the laptop user can still use the notebook display and its VGA/graphics connector from the notebook

NEW USB3.0 Docking Station Comparison

	Part#	Number of USB Ports	Superspeed USB3.0	Always On USB	Dual 1080p HD Video	Faster Gigabit Ethernet	Corporate Install	VGA	DVI	HDMI	Max. Resolution	Warranty
