Did you know? We have FIRA Approved Ergonomics

FIRA approved ergonomics. FIRA work with many blue chip companies to improve the productivity, efficiency, comfort and well-being of their staff by providing conducive environments and fit-for-purpose equipment.

Customer Conversation Starters

“We’re seeing a lot of interest in ergonomics at the moment. A Kensington survey of UK Spiceworks members uncovered that 47% of IT professionals took it upon themselves to improve the ergonomics of the working environments of their users. Are you aware of Kensington’s SmartFit system? It allows users to configure their workspace ergonomic accessory set up such as monitor risers, wrist rests and back rests themselves.”

“Can I share a copy of Kensington’s IT Professional Report with you on LinkedIn? It details the challenges facing IT professionals that are SpiceWorks members and provides some new ideas as to how IT professionals can empower their organisations.”

Don't forget to ask customers about:

Security

“How will monitors be protected?”

Kensington monitor arms let you lock the monitor and the monitor arm using a single Kensington lock.

Productivity

“Are you likely to replace your laptops soon?”

Consider a Kensington universal dock. They offer all the connectivity options of a proprietary dock but can be used with any laptop*.

Employee Wellbeing

“How do you know that your employees desks are correctly configured?”

Kensington SmartFit® solutions feature an easy to use colour coded system that users can adjust themselves.
