OWNER'S MANUAL

Welcome to clean air with TruSens. Thank you for allowing us to join you on your journey towards wellness.

The air you breathe should be clean, no matter where you are in the room. TruSens SensorPod™, PureDirect™ Technology & DuPont™ Filtration ensure the whole room benefits from cleaner air.

SAFETY INFORMATION

PLEASE READ AND SAVE THESE INSTRUCTIONS

Unplug or disconnect the appliance from the power supply before replacing filters or UV-C emitter, or when appliance is not in use.

WARNING: To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.

Do not operate any purifier with a damaged cord or plug, or if the wall socket is loose. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Do not run cord under carpeting, throw rugs, runners, or similar coverings. Do not run cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.

WARNING: Skin or eye damage may result from directly viewing the light produced by the UV-C emitter in this apparatus. Unintended use of the appliance or damage to the housing may result in the escape of dangerous UV-C radiation. UV-C radiation may, even in little doses, cause harm to the eyes and skin. Always disconnect power before relamping or servicing. Replace UV-C emitter with 2415108 (for Z-2000), or 2415111 (for Z-3000), Manufactured by ACCO Brands.

- Remove all packaging, including the filter bag, before use.
- Appliances that are obviously damaged must not be operated.
- This appliance must only be connected to a wall socket outlet matching the supply plug type and rating stated on the rating plate.
- Locate air purifier near the outlet wall socket and do not use extension cords.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with, clean, or try to maintain the appliance.
- Replace the UV-C emitter with the model specified within this manual.
- Do not attempt to service or repair this product yourself.
- Only use the purifier and SensorPod™ with the power cable provided.
- Only clean this machine with a damp cloth, do not use solvents or bleach.
- Ensure appliance is always placed on firm level surface before operation.
- Do not block or obstruct the air intake or outlet vents.
- Do not insert fingers or other items into the air intake or outlet vents.
- When the air purifier is in standby mode the SensorPod™ is still transmitting a signal/data.

Operating Frequency

Wireless: 2462 MHz

Maximum Transmit Power (EIRP)

Wireless: 0 dBm

Antenna Gain

Wireless: 2 Dbi

Hereby, ACCO UK Ltd declares that the radio equipment types TruSens Air Purifier Z-2000/Z-3000 are in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address: www.trusens.com/support.

Waste Electrical and Electronic Equipment (WEEE)

At the end of its useful life, your product is considered to be WEEE. As such, it is important to note that: WEEE is not to be disposed of as unsorted municipal waste. It is to be collected separately such that it can be disassembled so its components and materials can be recycled, re-used, and recovered (burned for energy content in the production of electricity).

Public collection points have been set up by municipalities for the collection of WEEE, free of charge to you. Please return your WEEE to the collection facility nearest your home or office.

If you have difficulty locating a collection facility, the retailer that sold you the product should accept your WEEE. If you are no longer in contact with your retailer, please contact ACCO for assistance with this matter. Recycling of WEEE is geared toward protecting the environment, protecting human health, preserving raw materials, improving sustainable development, and ensuring a better supply of commodities in the European Union. This will be achieved by retrieving valuable secondary raw materials and reducing the disposal of waste. You can contribute to the success of these goals by returning your WEEE to a collection facility.

Your product is marked with the WEEE symbol (wheelie bin with an X through it). This symbol is to inform you that the WEEE is not to be disposed of as unsorted municipal waste

FEATURE HIGHLIGHTS

SensorPod™
Remote air quality monitor that ensures cleaner air, right where you need it.

PureDirect™ Technology
Independent lab testing confirms that two airflow streams are better than one, moving air effectively and more comfortably throughout the room.

Informs and Adapts
Colour-coded illuminated ring provides additional information by communicating air quality in real-time.

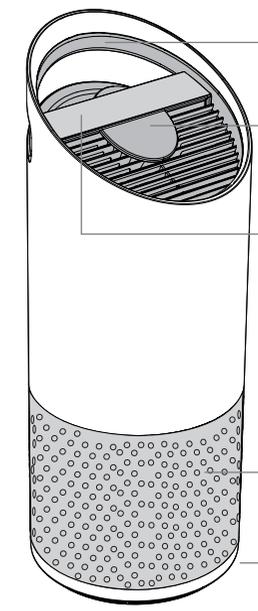

360° Purification
DuPont™ HEPA filter captures pollutants and VOC gases/odours from all directions. UV light kills germs and bacteria that can get trapped in the filter.

Thoughtful Execution
Exceptional functionality wrapped in a contemporary design that fits any environment.

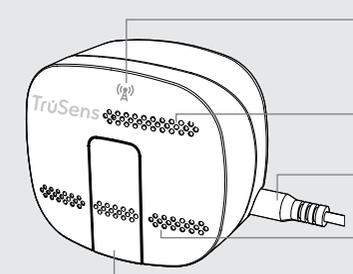

PRODUCT OVERVIEW

Air Purifier

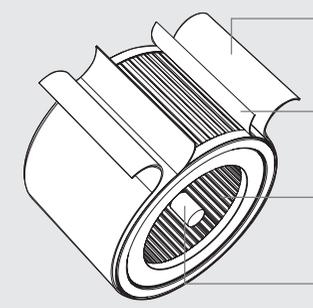

- Easy-carry handle
- Air quality indicator display
- Simple touch control panel
- 360° air intake
- Filter cover & knob (underneath)

SensorPod™

- Power & signal indicator
- Air outlet
- Power cord
- Air inlet
- Easy-access door

Filter & Ultraviolet Sterilisation

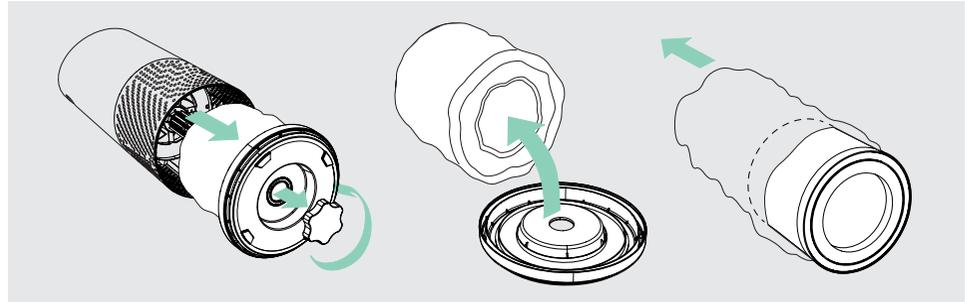

- Washable Prefilter
- Carbon Filter
- HEPA Filter
- UV Sterilisation

GETTING STARTED

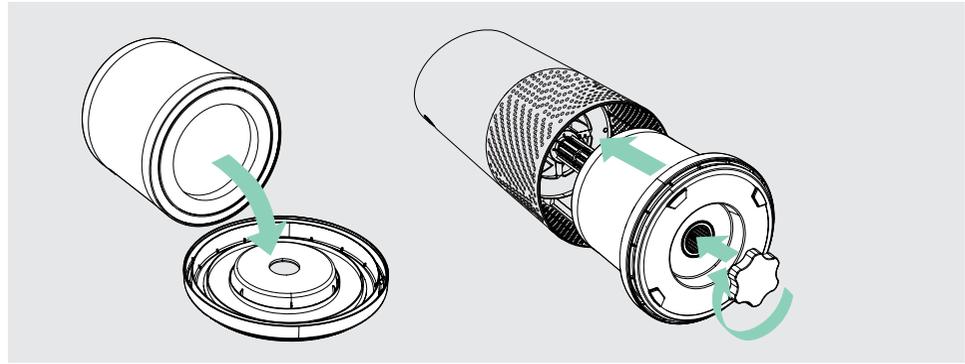

1. Remove plastic bag from filter

Unscrew the bottom cover and remove the plastic bag from the filter.

2. Re-attach filter

Secure filter on the bottom cover and replace inside the purifier.

3. Set up

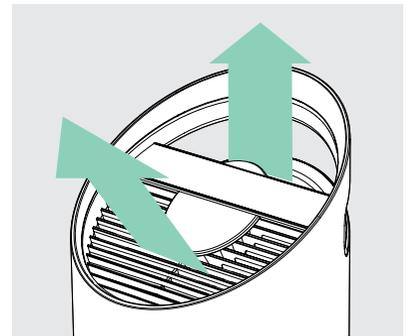

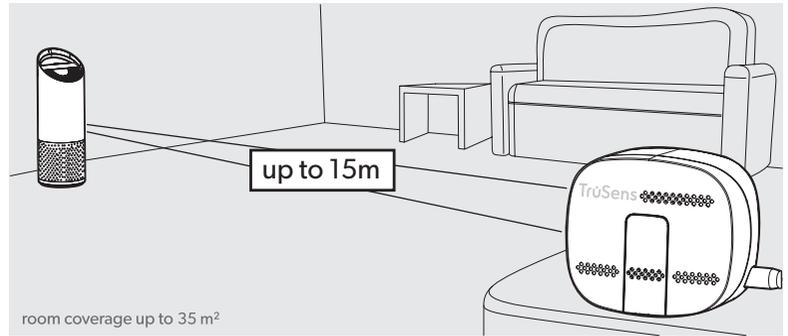

Plug-in your SensorPod™, and place upright on tabletop or counter across the room, within line of sight of the purifier.

Plug-in your air purifier unit and power on. Place the purifier on a flat surface, free from obstructions.

Signal strength may vary by location. In the rare occasion that it doesn't work – see page 18.

4. Start living with cleaner air!

The purifier will automatically adjust fan speeds based on the air quality readings from SensorPod, and proprietary PureDirect™ technology will deliver purified air throughout the room!

CONTROL PANEL

Power Button

Fan Speed Settings

Select fan speed or AUTO mode. In AUTO mode, purifier automatically adjusts fan speed based on air quality readings from SensorPod™.

(AUTO mode only available when purifier is paired with SensorPod and receiving signal)

Dimmer Mode

Display illumination turns off – for use while sleeping – without sacrificing the effectiveness of the purifier. Simply press the button again to bring back all display features.

Timer Mode

Purifier will automatically turn off after 2, 4, 8, or 12 hours. To cancel this countdown, simply press button until no timer setting is displayed.

UV Mode

UV bulb within the purifier's filter chamber is on when the ☀️ symbol is white. The ☀️ symbol will glow red when it is time to replace the UV bulb.

(See page 15 for replacement instructions)

Reset

Filter and UV Indicator Reset
HEPA, Carbon and UV indicators glow red when it is time for each to be replaced. When 1 indicator is on, simply hold Reset button for 3 seconds to reset that indicator. When 2+ indicators are on, tap the Reset button to select the correct indicator (selected indicator will blink) before holding 3 seconds to reset that indicator.

(See pages 13-15 for replacement instructions. Follow above Reset button instructions after replacing filter.)

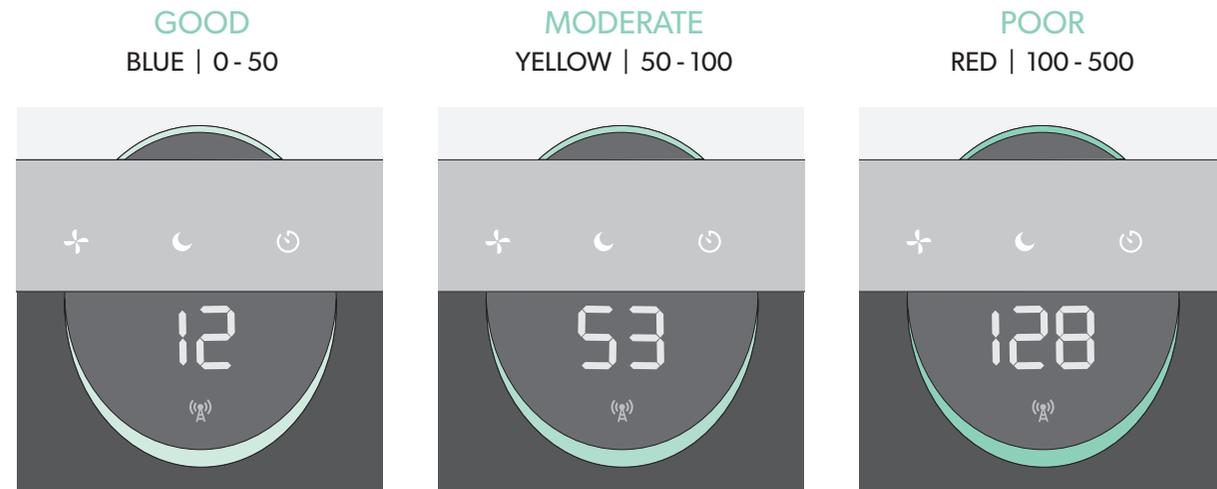

AIR QUALITY DISPLAY

Real-time Feedback

The revolutionary SensorPod™ evaluates the condition of your air by measuring both small (PM2.5) and larger (PM10) particulate matter. It calculates the overall air quality using a proprietary algorithm that is reactive to genuine increases in pollutants without overreacting to someone entering the room or settling into the couch.

The illuminated, colour-coded display communicates good, moderate or poor air quality and a numeric value provides a greater level of detail.

In AUTO mode, the purifier automatically adjusts the fan speed in response to these air quality readings.

TruSens utilises the Air Quality Index (1-500) created by the U.S. Environmental Protection Agency (EPA).

SPECIFICATIONS

Air Inlet	360°
Air changed 2 times per hr	35 m ²
Air Delivery Type	PureDirect™
Sensor	SensorPod™, works up to 15 m from purifier
Fan Speed Settings	Whisper, 1, 2, Turbo
Purification Levels	Washable Prefilter, Carbon, HEPA, UV
Timer Settings	2, 4, 8, 12 hr
Filter Change Indicators	Carbon, HEPA, UV
Noise	33 - 64 dB
Dimensions	223 x 223 x 567 mm
Weight	4.1 kg
Motor Type	DC motor
Power Requirements	220-240v 50/60Hz 0.5A
Power Consumption	28 W
Warranty	2 years

Replacement Filters & UV Bulb

3-in-1 HEPA drum filter	2415107
Carbon filter (3-pack)	2415106
UV Bulb	2415108

CARE & MAINTENANCE

Accessing the filter chamber

1. Always power off the purifier by pressing the Power Button and unplugging the power cord.
2. Gently place the unit on its side on the floor so that the filter chamber cover and knob are exposed.
3. Turn the knob counter-clockwise and remove the filter cover and 360° HEPA filter drum (Fig. A).

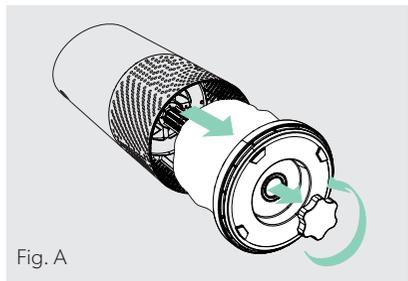

Fig. A

REPLACING HEPA FILTER

1. The HEPA indicator will glow red when it is time to change the entire HEPA drum filter.
2. Gently pull the HEPA drum filter away from its place secured to the filter cover (Fig. B).
3. Secure the replacement HEPA filter onto the filter cover (Fig. C).
4. Gently replace the filter cover with filter drum into the filter chamber and onto the threading, and turn the knob clockwise until the knob and filter chamber cover are securely tightened (Fig. D).
5. Plug-in and power on your purifier, and hold the Reset button until the red HEPA indicator turns off.

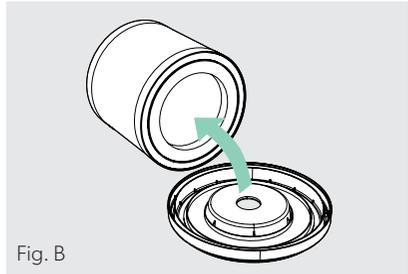

Fig. B

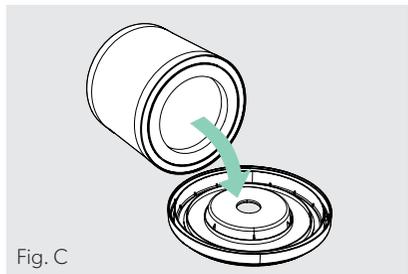

Fig. C

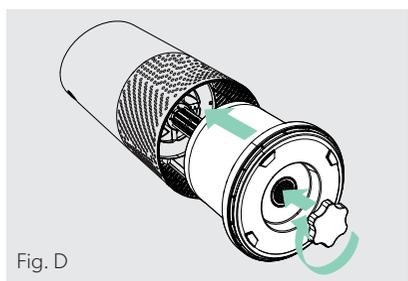

Fig. D

Note: HEPA drum filter (on page 12) will include 3 layers: Washable Prefilter, Carbon and HEPA

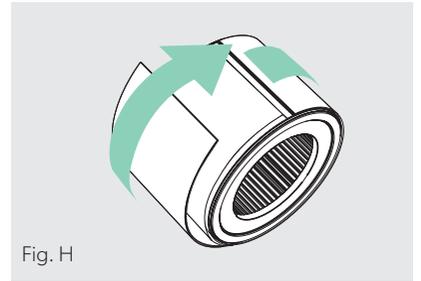

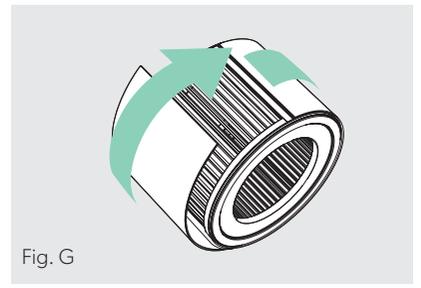

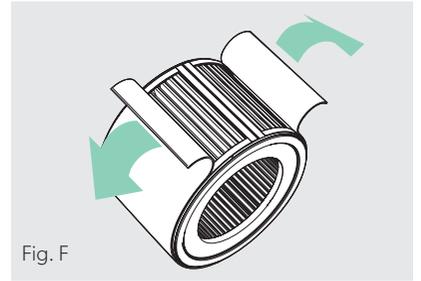

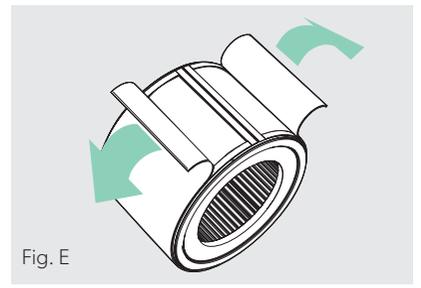

REPLACING CARBON FILTER

1. The Carbon indicator will glow red when it is time to replace the Carbon layer.
2. Gently peel away the Prefilter from the fastener strips (Fig. E).
3. Gently peel away the used Carbon layer from the fastener strips (Fig. F).
4. Wrap a new Carbon layer around the filter drum and attach to the same fastener strips (Fig. G).
5. Replace the Prefilter by wrapping it around the Carbon layer and attach to the fastener strips (Fig. H).
6. Once the purifier is powered-on, hold the Reset button until the red Carbon indicator turns off.

Note: Carbon filter 3-pack (on page 12) will cover 3 Carbon changes between replacing the entire HEPA drum filter assembly (on page 13).

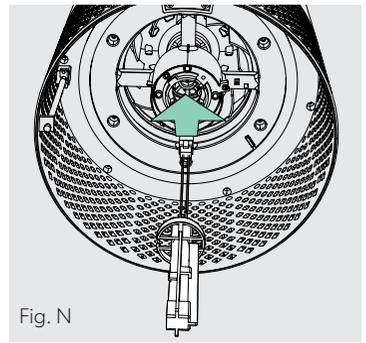

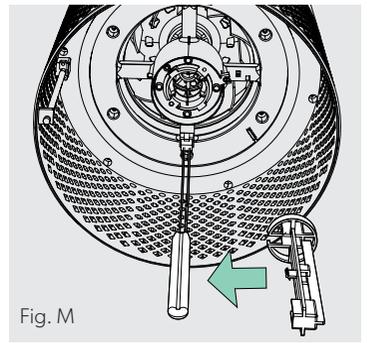

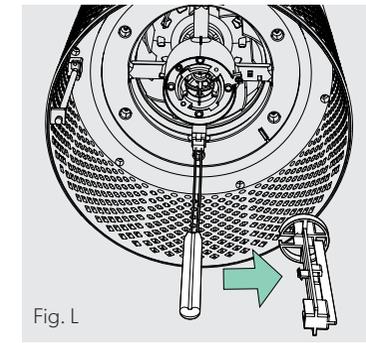

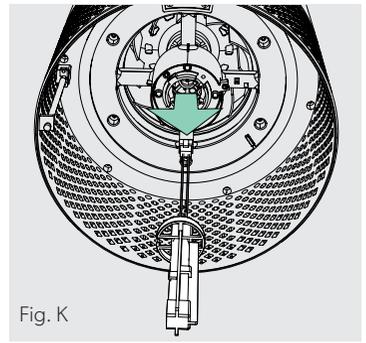

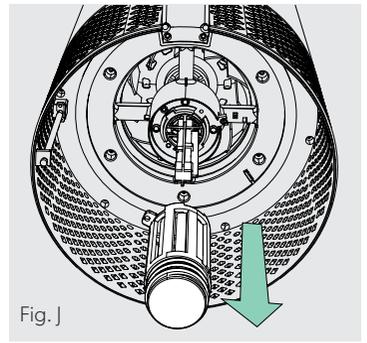

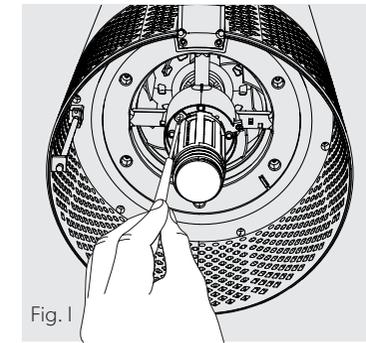

WASHING THE PREFILTER

1. We recommend that you visually inspect the Prefilter every month, and clean as needed. At minimum, you should hand wash the Prefilter every time you change the Carbon filter.
2. Gently peel away the Washable Prefilter from the fastener strips (Fig. E).
3. Gently rinse with running water – allow Prefilter to air dry before re-installing.
4. Replace the Prefilter by wrapping it around the filter drum and attach to the fastener strips (Fig. H).

REPLACING UV BULB

1. The  indicator will glow red when it is time to replace the UV bulb.
2. Remove HEPA filter drum (Fig. A), and use a screwdriver to remove the screw securing the UV housing (Fig. I).
3. Gently remove the UV housing (Fig. J) and disconnect the UV bulb from the socket (Fig. K).
4. Release carriage from the UV bulb (Fig. L).
5. Secure carriage to new UV bulb (on page 12) (Fig. M) and connect UV bulb into purifier (Fig N).
6. Replace the UV housing and use a screwdriver to tighten the fastening screw.
7. Once the purifier is powered-on, hold the Reset button until the  indicator turns white.

CLEANING THE SENSORPOD™

Cleaning the air quality sensor

The SensorPod™ uses an infrared light to detect particulate matter, so it is important that you clean the viewing chamber every 1-2 months to remove any dust or particles that may affect the accuracy of the sensor's readings.

1. Turn-off the SensorPod by unplugging the power cord.
2. Open the easy-access door on the front side by pulling the door up at a 90° angle.
3. Use a damp cotton swab to wipe the lens and intake area of the dust sensor (Fig. O).
4. Use a dry cotton swab to wipe away any remaining moisture.
5. Close the cover by rotating the door back down and sliding it back into place until you hear a click.

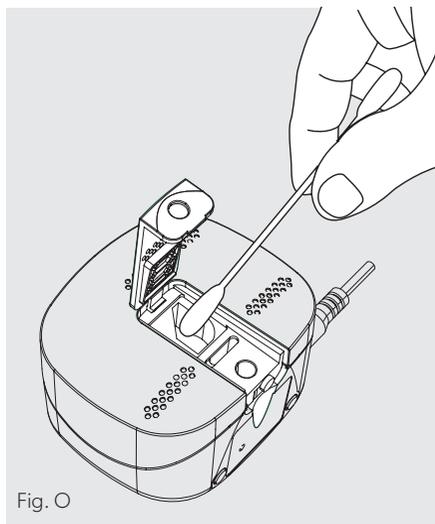

Fig. O

FAQ & TROUBLESHOOTING

Where do I place the SensorPod™?	Anywhere you want to measure the air quality within the room! For optimal results, place the SensorPod™ up to 15 m away from the air purifier on a counter or table, within line of sight of the purifier. In Auto Mode, the purifier will work to distribute clean air until the SensorPod reads an acceptable level of air quality.
How often do I need to change the filters?	That's easy! The purifier's replacement indicators will notify you when it is time to replace the Carbon or HEPA filters, or the UV bulb. Plan on replacing the Carbon every 3-4 months, HEPA every 12-15 months, and UV bulb every 1-3 years.
How often do I need to wash the Prefilter?	The Prefilter captures larger particles and preserves the efficiency of the other filters, so we recommend that you visually inspect the prefilter every month and wash as needed. Another good habit is to wash the prefilter every time you replace the Carbon filter.
How often do I need to clean the dust sensor within SensorPod™?	For the most accurate measurement of your air quality, we'd recommend you clean the surface of the dust sensor every 1-2 months.
Purifier won't turn on.	Check that the power cord is connected securely to both the wall outlet and the purifier. Check if there is a power outage in the outlet by trying a nearby light or device, or by trying a working device in the same outlet. Check that the HEPA filter is fitted properly into filter chamber. Please contact us if you're still having a problem! (page 19)

FAQ & TROUBLESHOOTING

<p>Purifier won't go into Auto Mode.</p> <p>OR</p> <p>Air quality indicators are off.</p> <p>OR</p> <p>Purifier's sensor signal indicator is blinking.</p>	<p>First, check that the SensorPod is plugged-in and that its light is solid.</p> <p>Next, check that the SensorPod is within range of the purifier (up to 15m).</p> <p>If both are true and the connection is still failing, see below instructions on repairing the SensorPod's connection.</p>
<p>I've lost my SensorPod™!</p>	<p>Don't worry! Please contact our customer support team and you can order a replacement SensorPod. Follow the easy pairing instructions below to pair your replacement SensorPod with your existing air purifier!</p>

Pairing SensorPod™ and Purifier

The SensorPod communicates with the purifier using radio frequency signals, and will be paired on the production line and ready for use when you open the box. In the rare event that the signal is interrupted, the purifier's sensor indicator light (📶) will blink. You can repair the connection in just a few easy steps.

1. Unplug the SensorPod.
2. HOLD the Power Button on the purifier for 3 seconds, when you should hear two chimes.
3. Plug-in the SensorPod and use an item with a small point (paper clip) to press and HOLD the pairing button underneath the SensorPod for 5-7 seconds (Fig. P).

4. The connection is established when the purifier's sensor indicator light is lit with no blinking, and the air quality indicators turn on.

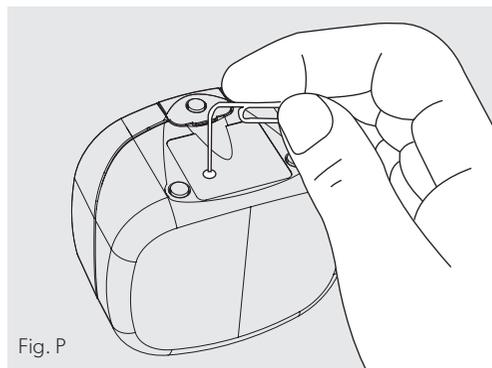

Fig. P

GUARANTEE

Operation of this machine is guaranteed for two years from date of purchase, subject to normal use. Within the guarantee period, ACCO Brands Europe will at its own discretion either repair or replace the defective machine free of charge. Defects due to misuse or use for inappropriate purposes are not covered under the guarantee. Proof of date of purchase will be required. Repairs or alterations made by persons not authorized by ACCO Brands Europe will invalidate the guarantee. It is our aim to ensure that our products perform to the specifications stated. This guarantee does not affect the legal rights which consumers have under applicable national legislation governing the sale of goods.

SUPPORT

Thank you for welcoming TruSens™ into your home. Our customers are at the heart of what we do, and we strive to design products that fit your lifestyle. If you have any questions or feedback, please reach out!
