

## Windows installation process

1. Download DockWorks from [www.kensington.com](http://www.kensington.com).
2. Locate the file and double-click it to launch the installation process.
  - If prompted with 'Do you want to allow the following program to make changes to this computer?' select 'Yes'.
3. The installation process may take several minutes to complete.

4. A message is provided letting you know that DockWorks has completed its installation process. Click 'OK' to proceed.

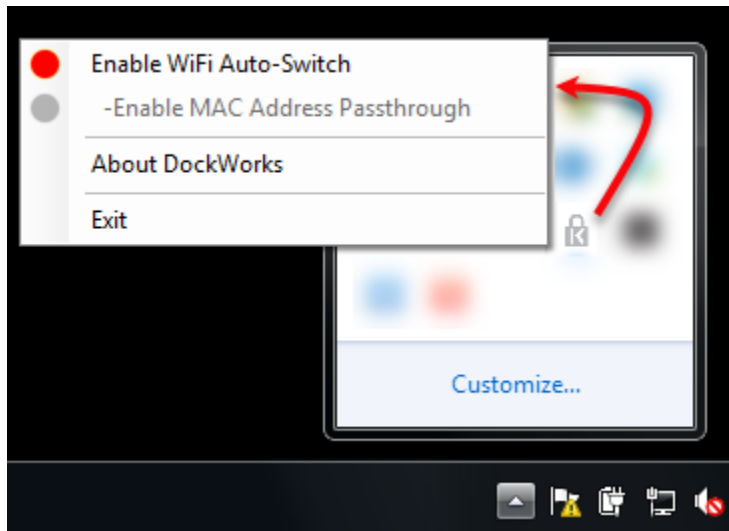

5. DockWorks is now installed on your computer and can be accessed via the Task Tray, or via Start → All Programs → Kensington → Kensington DockWorks

6. With DockWorks installed, you can:

- Enable (green) or Disable (red): WiFi Auto-Switch
  - WiFi Auto Switch allows the dock to prioritise LAN (Ethernet) over WiFi when you are docked. When you undock, the laptop will resume using WiFi.
- Enable (green) or Disable (red): MAC Address Passthrough
  - MAC Address Passthrough allows the docking station to mirror the Laptop's MAC ID. When you undock the laptop, the dock resets to its default MAC ID.
- About DockWorks
  - Informs you of the latest version installed, as well as letting you check if a newer version is available.
- Exit
  - Allows you to close DockWorks

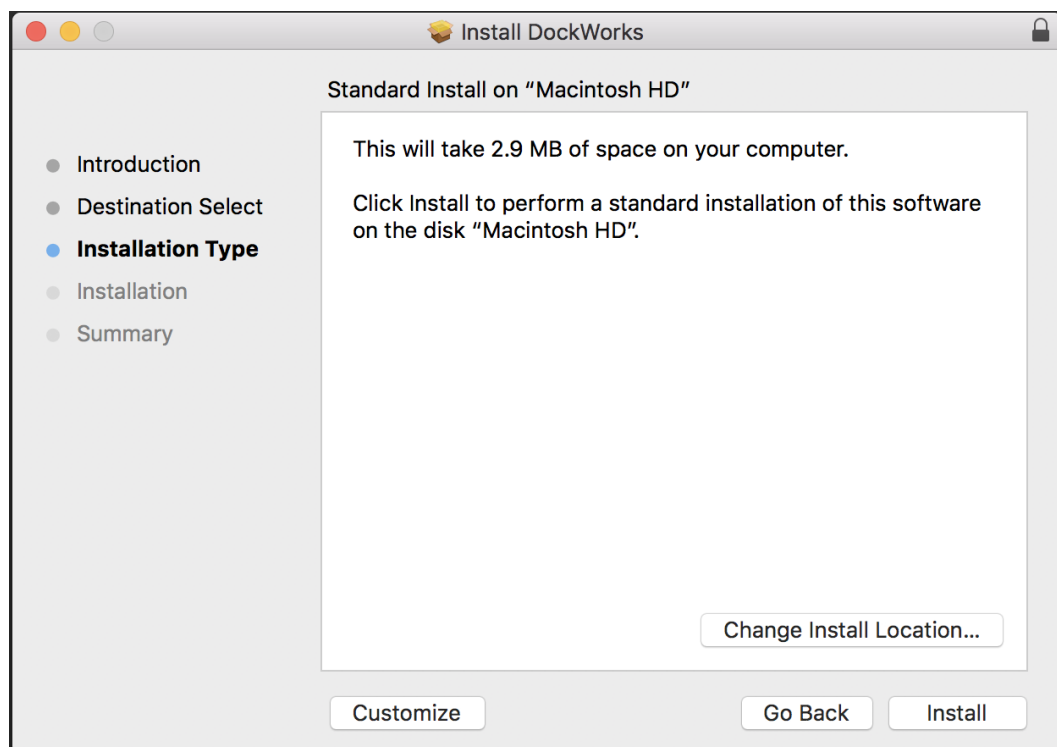

## Mac installation process

1. Download DockWorks from [www.kensington.com](http://www.kensington.com).
2. Locate the file and double-click it to launch the installation process.
3. Click 'Continue' to proceed.

4. Change the 'Install Location' if desired and then click 'Install' to proceed.

5. If prompted, input your password and click on 'Install Software'.
  - The installation process may take several minutes to complete.

6. A message is provided informing you that the installation process was successful.
7. You may now click 'Close' on the installation window.

8. After the installation process, DockWorks will auto launch, and there will be a shortcut under Applications.

9. With DockWorks installed, you can:

- Enable (green) or Disable (red): WiFi Auto-Switch
  - WiFi Auto Switch allows the dock to prioritise LAN (Ethernet) over WiFi when you are docked. When you undock, the laptop will resume using WiFi.
- Enable (green) or Disable (red): MAC Address Passthrough
  - MAC Address Passthrough allows the docking station to mirror the Laptop's MAC ID. When you undock the laptop, the dock resets to its default MAC ID.
- About DockWorks
  - Informs you of the latest version installed, as well as letting you check if a newer version is available.
- Exit
  - Allows you to close DockWorks
